

Dog Measurements

Taking Measurements:

It is helpful to have a collar around your pets neck, it serves as a reference point when measuring.

1. Measure from the collar to the base of the tail for total length.

2. Measure around the neck.

3. Measure around the chest directly behind the front legs.

4. Measure around the tummy.

Leave enough clearance for male dogs so the sweater won't get wet when the dog pees.

5. Measure the distance between the front legs.

6. Measure down the center of the chest to the legs.
